

*“God saw everything that God had made,
and indeed, it was very good.”*

Genesis 1:31

Wondering what you can do to protect God’s good creation? Why not put Energy Star light bulbs to work? Compact fluorescent light bulbs save money, use less energy, and help protect the environment. Each bulb:

- Uses up to 66% less energy than incandescent bulbs
- Lasts up to ten times longer
- Can save \$50 in energy costs over the life of the bulb
- Prevents greenhouse gas emissions, which cause global warming

As people of faith, we are called to be good stewards of God’s earth. Reducing our greenhouse gas emissions is one of the most important ways we can do that.

You can buy these bulbs and water conservation tools by filling out the other side of this order form and including a check for the total made out to Unity Church Frederick. The deadline for placing orders is May 31st. Orders can be placed in the order envelope in the church foyer or can be given to Steve Poole, Jessica Batten or Rev. Toni Fish.

This sale is organized in partnership with Greater Washington Interfaith Power and Light (GW IPL). A non-profit initiative that empowers faith communities in the Washington, D.C., area to act as stewards of creation. We help congregations learn about climate change, and take practical steps – in their buildings, their members’ homes, and their communities – to lighten the impacts of their energy use. Together, we can put our faith into action toward a healthy, just, and sustainable world.
